

# Vice President Speech

Hello and good morning, my name is Andrew Brust and i'm running for vice president alongside presidential candidate Dylan Piccione. I am diligent, respectful, and helpful in the Mepham community. My goal is to make not only the mepham community but this entire country a better place. I am going to work hard to make many positive changes that will benefit people from all walks of life. As your new vice president I will also work with both parties to make sure we can fix bipartisan splits on any and ALL bills. With me as your Vice President I will help everyone and support all the president's decisions. From my experiences with our community as a part of LEO club, I will support everyone and make sure that both high and low income families and family's that aren't as fortunate as others will get the necessary assistance they need while still helping them maintain independence and eventually live without government assistance and become financially independent.

When I Look for a role model, I refer to John F. Kennedy.

Economically John F Kennedy increased the minimum wage which I plan to do as well as your vice president. JFK also moved a years worth of spending forward to jumpstart the economy once he was elected with almost no fight from congress. For my economic plan I will bring more jobs into the US from abroad. I will also make sure that American born citizens are first in line when it comes to looking for jobs. I will also help small business grow and prosper as it is the small businesses that are the foundation of what America was built upon. Economics also greatly affects our schooling system. With me as your Vice President I will work to make sure that less fortunate students get a fair chance at an education by granting fair loans to families with lower incomes. We will accomplish this by moving the necessary funds from other places of the government that do not need as much into our educational system. As for the national debt it must be brought down. I'm not saying I will be able to make the debt disappear but when I take office my team and I will work to help significantly reduce the debt of our nation.

The educational system in the U.S. is extremely poor, and needs a lot of work. While attending school, a students job is to pay attention, get good grades, and learn different subjects that help them become hardworking, successful adults when they are older. Unfortunately in the United States this is not the case, and with me as your vice president I will work alongside the president to fix it. In school there are many distractions preventing students from getting the education they need, some examples include too much homework, bullying, drugs, etc. The president and I are going to work diligently to ensure that these kids get the education they need, and the education they deserve. It is imperative that these students do well in school so that they may be successful, because they are OUR future! In order to fix this, the president and I are figuring out ways to make schooling safer and easier, so that the students are protected and stress free while getting there necessary education. Now in present day there has been a growing fear of "school shootings," to fix this fear and ease students nerves we will "beef" up

school security. Every school,(no matter what grade or type of school) will get metal detectors near every outer doorway, cameras with viewpoints to every classroom and corridor,(excluding bathrooms and locker rooms, of course) and lastly, at least 10-15 trained security guards armed with taser guns, pepper spray, and police batons, to secure the school grounds and buildings. With these changes students can feel school is a safer and more secure learning environment. Another issue with the U.S. education system is money itself, some schools lack the money and this creates a financial burden on schools and prevents them from doing their job of teaching students. The president and I are going to work to take money from where it is least needed, and put it into these schools that do need it, so that they can provide students with the education they need, along with extracurricular activities such as sports and clubs, that are vital to a students development. Together the president and I can assure you that the U.S. educational system will see big improvements and be an overall safer place for both students and staff, if we are elected.

The United States also has been having a big problem with the amount of undocumented immigrants entering the United States. Some of these undocumented immigrants come from bad areas that seek a new beginning but with all the good there is always a few that are unfortunately bad. These “bad” immigrants aren't here for a better life but are here to exploit the American government to their needs. To solve this issue we have decided that trying to seek out all or the immigrants is near impossible to do, so we have to target the ones who are doing illegal activities. Sending all of the illegal immigrants back to their home country isn't necessarily right and immigrants are actually very beneficial and they help stimulate the economy. By helping out those who are in the pursuit of a new and better life, I as Vice President can give jobs back to Americans yet keep a stable amount of immigrants in the work force to better the Economy.

Overall with I, Andrew as your Vice President, and Dylan, as your President the United States will be a safer more prosperous country, because together we can take to the skies.
