

Presidential Speech

Hello my fellow Americans, my name is Dylan Piccione and I am running to be president of the United States. Since I was 10 years old I have been hard at work to help provide for my family and did as much as I could to help them out. I was also leader of a raid and crucible team which won many tournaments and matches against some of our toughest opponents. As president I will be hard working and make smart decisions to help give America the leader they need and deserve. My goal is to help keep America as the strongest nation on the planet, with the help from my campaign team and the citizens of the United States.

The United States is in dire need of a better educational system, there are many kids in the U.S. who are not getting the proper education they need to become successful adults. This upsets me because the kids of today are our future tomorrow, if we don't take care of America's youth - how will we see a better brighter future for our country in the days to come. It is imperative that we fix the American educational system and my team and I will see to it that we do. First we are going to strengthen school security, with a more secure school environment students will feel school is a safer environment and will pay better attention in class. In order to do this we are going to hire extra security guards and install metal detectors and cameras for each school. Secondly we are going to fix schools budgets, in different areas there are some schools that lack the funding to help give kids the education they need. My team and I are going to fix this by moving funding from schools that don't necessarily need it and giving it to the schools that do. This change will help give students the chance to get the education they need and also provide them with extracurricular activities that are vital to a students development. With the help from my team and I, the U.S. educational system will be fixed and every student will have a fair chance to achieve the proper education.

The United states has numerous problems with the economy as well. From wage gaps between genders, to ridiculously high debt, the economy needs a lot of work. Men and women of the workplace should be treated equally but unfortunately it's a fact women statistically make less than men for similar if not the same jobs. My team and I are going to work diligently to close this gap and see to it that women have equal pay as men do. We are also going to undertake the endeavour of reducing the debt of our authoritative and extremely capable country. We will do so by budgeting and moving any leftover money towards the country's debt. I cannot promise that I will be able to get rid of the debt but we will significantly lower it so it becomes less of an issue and in doing so we can shift our focus onto other economic issues. With the help of my team we can work together to fix the United State's economy for the better.

We have also have seen an increase in activity from multiple different terrorist groups such as the Islamic State of Iraq and Syria A.K.A. ISIS. ISIS has become the deadliest terrorist organization of the new Millennium. They see a future in death and therefore we cannot eradicate them through any means but force. But the trouble does not stop there, as we have learned from our history, when we leave the area they regroup and reform we need to destroy their motive and ensure the area is controlled by a strong democratic leader who is bipartisan. In addition, we will observe this new leader and intervene if there are any human rights violations. You do not decrease the crime rate when you reduce police activity, why would you do the same in the middle east? The middle east is delicate and especially difficult to govern because there is no separation between religion and state. This means most forms of legislature are governed by their holy laws. Radical forms of their religion are what sprouts terrorism. It will be very hard to do this but once achieved many middle eastern countries can achieve first world status among the rest of civilized nations. Overall with the help from my team we can see to it that the U.S. is a safer place for all Americans with fewer threats from outside nations.

My goal for the United States is to use my my leadership and work experience to give this country a push in the right direction, so that all citizens may have an easier happier life. Thank you very much for your time and may you enjoy the rest of your day.

My team and I are going to fix this by moving funding from schools that don't necessarily need it and giving it to the schools that do. This change will help give students the chance to get the education they need and also provide them with extracurricular activities that are vital to a students development. With the help from my team and I, the U.S. educational system will be fixed and every student will have a fair chance to achieve the proper education.

The United states has numerous problems with the economy as well. From wage gaps between genders, to ridiculously high debt, the economy needs a lot of work. Men and women of the workplace should be treated equally but unfortunately it's a fact women statistically make less than men for similar if not the same jobs. My team and I are going to work diligently to close this gap and see to it that women have equal pay as men do. We are also going to undertake the endeavour of reducing the debt of our authoritative and extremely capable country. We will do so by budgeting and moving any leftover money towards the country's debt. I cannot promise that I will be able to get rid of the debt but we will significantly lower it so it becomes less of an issue and in doing so we can shift our focus onto other economic issues. With the help of my team we can work together to fix the United State's economy for the better.

We have also have seen an increase in activity from multiple different terrorist groups such as the Islamic State of Iraq and Syria A.K.A. ISIS. ISIS has become the deadliest terrorist organization of the new Millennium. They see a future in death and therefore we cannot eradicate them through any means but force. But the trouble does not stop there, as we have learned from our history, when we leave the area they regroup and reform we need to destroy their motive and ensure the area is controlled by a strong democratic leader who is bipartisan. In addition, we will observe this new leader and intervene if there are any human rights violations. You do not decrease the crime rate when you reduce police activity, why would you do the same in the middle east? The middle east is delicate and especially difficult to govern because there is no separation between religion and state. This means most forms of legislature are governed by their holy laws. Radical forms of their religion are what sprouts terrorism. It will be very hard to

do this but once achieved many middle eastern countries can achieve first world status among the rest of civilized nations. Overall with the help from my team we can see to it that the U.S. is a safer place for all Americans with fewer threats from outside nations.

My goal for the United States is to use my leadership and work experience to give this country a push in the right direction, so that all citizens may have an easier happier life. Thank you very much for your time and may you enjoy the rest of your day.

Presidential Speech

Hello my fellow Americans, my name is Dylan Piccione and I am running to be president of the United States. Since I was 10 years old I have been hard at work to help provide for my family and did as much as I could to help them out. I was also leader of a raid and crucible team which won many tournaments and matches against some of our toughest opponents. As president I will be hard working and make smart decisions to help give America the leader they need and deserve. My goal is to help keep America as the strongest nation on the planet, with the help from my campaign team and the citizens of the United States.

The United States is in dire need of a better educational system, there are many kids in the U.S. who are not getting the proper education they need to become successful adults. This upsets me because the kids of today are our future tomorrow, if we don't take care of America's youth - how will we see a better brighter future for our country in the days to come. It is imperative that we fix the American educational system and my team and I will see to it that we do. First we are going to strengthen school security, with a more secure school environment students will feel school is a safer environment and will pay better attention in class. In order to do this we are going to hire extra security guards and install metal detectors and cameras for each school. Secondly we are going to fix schools budgets, in different areas there are some schools that lack the funding to help give kids the education they need. My team and I are going to fix this by moving funding from schools that don't necessarily need it and giving it to the schools that do. This change will help give students the chance to get the education they need and also provide them with extracurricular activities that are vital to a students development. With the help from my team and I, the U.S. educational system will be fixed and every student will have a fair chance to achieve the proper education.

We have also have seen an increase in activity from multiple different terrorist groups such as the Islamic State of Iraq and Syria A.K.A. ISIS. ISIS has become the deadliest terrorist organization of the new Millennium. They see a future in death and therefore we cannot eradicate them through any means but force. But the trouble does not stop there, as we have learned from our history, when we leave the area they regroup and reform we need to destroy their motive and ensure the area is controlled by a strong democratic leader who is bipartisan. In addition, we will observe this new leader and intervene if there are any human rights violations. You do not decrease the crime rate when you reduce police activity, why would you do the same in the middle east? The middle east is delicate and especially difficult to govern because there is no separation between religion and state. This means most forms of legislature are governed by their holy laws. Radical forms of their religion are what sprouts terrorism. It will be very hard to do this but once achieved many middle eastern countries can achieve first world status among the rest of civilized nations. Overall with the help from my team we can see to it that the U.S. is a safer place for all Americans with fewer threats from outside nations.

My goal for the United States is to use my my leadership and work experience to give this country a push in the right direction, so that all citizens may have an easier happier life. Thank you very much for your time and may you enjoy the rest of your day.

Presidential Speech

Hello my fellow Americans, my name is Dylan Piccione and I am running to be president of the United States. Since I was 10 years old I have been hard at work to help provide for my family and did as much as I could to help them out. I was also leader of a raid and crucible team which won many tournaments and matches against some of our toughest opponents. As president I will be hard working and make smart decisions to help give America the leader they need and deserve. My goal is to help keep America as the strongest nation on the planet, with the help from my campaign team and the citizens of the United States.

The United States is in dire need of a better educational system, there are many kids in the U.S. who are not getting the proper education they need to become successful adults. This upsets me because the kids of today are our future tomorrow, if we don't take care of America's youth - how will we see a better brighter future for our country in the days to come. It is imperative that we fix the American educational system and my team and I will see to it that we do. First we are going to strengthen school security, with a more secure school environment students will feel school is a safer environment and will pay better attention in class. In order to do this we are going to hire extra security guards and install metal detectors and cameras for each school. Secondly we are going to fix schools budgets, in different areas there are some schools that lack the funding to help give kids the education they need. My team and I are going to fix this by moving funding from schools that don't necessarily need it and giving it to the schools that do. This change will help give students the chance to get the education they need and also provide them with extracurricular activities that are vital to a students development. With the help from my team and I, the U.S. educational system will be fixed and every student will have a fair chance to achieve the proper education.

The United states has numerous problems with the economy as well. From wage gaps between genders, to ridiculously high debt, the economy needs a lot of work. Men and women of the workplace should be treated equally but unfortunately it's a fact women statistically make less than men for similar if not the same jobs. My team and I are going to work diligently to close this gap and see to it that women have equal pay as men do. We are also going to undertake the endeavour of reducing the debt of our authoritative and extremely capable country. We will do so by budgeting and moving any leftover money towards the country's debt. I cannot promise that I will be able to get rid of the debt but we will significantly lower it so it becomes less of an

issue and in doing so we can shift our focus onto other economic issues. With the help of my team we can work together to fix the United State's economy for the better.

We have also have seen an increase in activity from multiple different terrorist groups such as the Islamic State of Iraq and Syria A.K.A. ISIS. ISIS has become the deadliest terrorist organization of the new Millennium. They see a future in death and therefore we cannot eradicate them through any means but force. But the trouble does not stop there, as we have learned from our history, when we leave the area they regroup and reform we need to destroy their motive and ensure the area is controlled by a strong democratic leader who is bipartisan. Hello my fellow Americans, my name is Dylan Piccione and I am running to be president of the United States. Since I was 10 years old I have been hard at work to help provide for my family and did as much as I could to help them out. I was also leader of a raid and crucible team which won many tournaments and matches against some of our toughest opponents. As president I will be hard working and make smart decisions to help give America the leader they need and deserve. My goal is to help keep America as the strongest nation on the planet, with the help from my campaign team and the citizens of the United States.

The United States is in dire need of a better educational system, there are many kids in the U.S. who are not getting the proper education they need to become successful adults. This upsets me because the kids of today are our future tomorrow, if we don't take care of America's youth - how will we see a better brighter future for our country in the days to come. It is imperative that we fix the American educational system and my team and I will see to it that we do. First we are going to strengthen school security, with a more secure school environment students will feel school is a safer environment and will pay better attention in class. In order to do this we are going to hire extra security guards and install metal detectors and cameras for each school. Secondly we are going to fix schools budgets, in different areas there are some schools that lack the funding to help give kids the education they need. My team and I are going to fix this by moving funding from schools that don't necessarily need it and giving it to the schools that do. This change will help give students the chance to get the education they need and also provide them with extracurricular activities that are vital to a students development. With the help from my team and I, the U.S. educational system will be fixed and every student will have a fair chance to achieve the proper education.

The United states has numerous problems with the economy as well. From wage gaps between genders, to ridiculously high debt, the economy needs a lot of work. Men and women of the workplace should be treated equally but unfortunately it's a fact women statistically make less than men for similar if not the same jobs. My team and I are going to work diligently to close this gap and see to it that women have equal pay as men do. We are also going to undertake the endeavour of reducing the debt of our authoritative and extremely capable country. We will do so by budgeting and moving any leftover money towards the country's debt. I cannot promise that I will be able to get rid of the debt but we will significantly lower it so it becomes less of an

issue and in doing so we can shift our focus onto other economic issues. With the help of my team we can work together to fix the United State's economy for the better.

We have also have seen an increase in activity from multiple different terrorist groups such as the Islamic State of Iraq and Syria A.K.A. ISIS. ISIS has become the deadliest terrorist organization of the new Millennium. They see a future in death and therefore we cannot eradicate them through any means but force. But the trouble does not stop there, as we have learned from our history, when we leave the area they regroup and reform we need to destroy their motive and ensure the area is controlled by a strong democratic leader who is bipartisan. In addition, we will observe this new leader and intervene if there are any human rights violations. You do not decrease the crime rate when you reduce police activity, why would you do the same in the middle east? The middle east is delicate and especially difficult to govern because there is no separation between religion and state. This means most forms of legislature are governed by their holy laws. Radical forms of their religion are what sprouts terrorism. It will be very hard to do this but once achieved many middle eastern countries can achieve first world status among the rest of civilized nations. Overall with the help from my team we can see to it that the U.S. is a safer place for all Americans with fewer threats from outside nations.

My goal for the United States is to use my my leadership and work experience to give this country a push in the right direction, so that all citizens may have an easier happier life. Thank you very much for your time and may you enjoy the rest of your day.

My team and I are going to fix this by moving funding from schools that don't necessarily need it and giving it to the schools that do. This change will help give students the chance to get the education they need and also provide them with extracurricular activities that are vital to a students development. With the help from my team and I, the U.S. educational system will be fixed and every student will have a fair chance to achieve the proper education.

The United states has numerous problems with the economy as well. From wage gaps between genders, to ridiculously high debt, the economy needs a lot of work. Men and women of the workplace should be treated equally but unfortunately it's a fact women statistically make less than men for similar if not the same jobs. My team and I are going to work diligently to close this gap and see to it that women have equal pay as men do. We are also going to undertake the endeavour of reducing the debt of our authoritative and extremely capable country. We will do so by budgeting and moving any leftover money towards the country's debt. I cannot promise that I will be able to get rid of the debt but we will significantly lower it so it becomes less of an

issue and in doing so we can shift our focus onto other economic issues. With the help of my team we can work together to fix the United State's economy for the better.

We have also have seen an increase in activity from multiple different terrorist groups such as the Islamic State of Iraq and Syria A.K.A. ISIS. ISIS has become the deadliest terrorist organization of the new Millennium. They see a future in death and therefore we cannot eradicate them through any means but force. But the trouble does not stop there, as we have learned from our history, when we leave the area they regroup and reform we need to destroy their motive and ensure the area is controlled by a strong democratic leader who is bipartisan. In addition, we will observe this new leader and intervene if there are any human rights violations. You do not decrease the crime rate when you reduce police activity, why would you do the same in the middle east? The middle east is delicate and especially difficult to govern because there is no separation between religion and state. This means most forms of legislature are governed by their holy laws. Radical forms of their religion are what sprouts terrorism. It will be very hard to do this but once achieved many middle eastern countries can achieve first world status among the rest of civilized nations. Overall with the help from my team we can see to it that the U.S. is a safer place for all Americans with fewer threats from outside nations.

My goal for the United States is to use my my leadership and work experience to give this country a push in the right direction, so that all citizens may have an easier happier life. Thank you very much for your time and may you enjoy the rest of your day.

Presidential Speech

Hello my fellow Americans, my name is Dylan Piccione and I am running to be president of the United States. Since I was 10 years old I have been hard at work to help provide for my family and did as much as I could to help them out. I was also leader of a raid and crucible team which won many tournaments and matches against some of our toughest opponents. As president I will be hard working and make smart decisions to help give America the leader they need and deserve. My goal is to help keep America as the strongest nation on the planet, with the help from my campaign team and the citizens of the United States.

The United States is in dire need of a better educational system, there are many kids in the U.S. who are not getting the proper education they need to become successful adults. This upsets me because the kids of today are our future tomorrow, if we don't take care of America's youth - how will we see a better brighter future for our country in the days to come. It is imperative that we fix the American educational system and my team and I will see to it that we do. First we are going to strengthen school security, with a more secure school environment

students will feel school is a safer environment and will pay better attention in class. In order to do this we are going to hire extra security guards and install metal detectors and cameras for each school. Secondly we are going to fix schools budgets, in different areas there are some schools that lack the funding to help give kids the education they need. My team and I are going to fix this by moving funding from schools that don't necessarily need it and giving it to the schools that do. This change will help give students the chance to get the education they need and also provide them with extracurricular activities that are vital to a students development. With the help from my team and I, the U.S. educational system will be fixed and every student will have a fair chance to achieve the proper education.

The United states has numerous problems with the economy as well. From wage gaps between genders, to ridiculously high debt, the economy needs a lot of work. We have also have seen an increase in activity from multiple different terrorist groups such as the Islamic State of Iraq and Syria A.K.A. ISIS. ISIS has become the deadliest terrorist organization of the new Millennium. They see a future in death and therefore we cannot eradicate them through any means but force. But the trouble does not stop there, as we have learned from our history, when we leave the area they regroup and reform we need to destroy their motive and ensure the area is controlled by a strong democratic leader who is bipartisan. In addition, we will observe this new leader and intervene if there are any human rights violations. You do not decrease the crime rate when you reduce police activity, why would you do the same in the middle east? The middle east is delicate and especially difficult to govern because there is no separation between religion and state. This means most forms of legislature are governed by their holy laws. Radical forms of their religion are what sprouts terrorism. It will be very hard to do this but once achieved many middle eastern countries can achieve first world status among the rest of civilized nations. Overall with the help from my team we can see to it that the U.S. is a safer place for all Americans with fewer threats from outside nations.

My goal for the United States is to use my my leadership and work experience to give this country a push in the right direction, so that all citizens may have an easier happier life. Thank you very much for your time and may you enjoy the rest of your day.

Presidential Speech

Hello my fellow Americans, my name is Dylan Piccione and I am running to be president of the United States. Since I was 10 years old I have been hard at work to help provide for my family and did as much as I could to help them out. I was also leader of a raid and crucible team which won many tournaments and matches against some of our toughest opponents. As president I will be hard working and make smart decisions to help give America the leader they need and deserve. My goal is to help keep America as the strongest nation on the planet, with the help from my campaign team and the citizens of the United States.

The United States is in dire need of a better educational system, there are many kids in the U.S. who are not getting the proper education they need to become successful adults. This upsets me because the kids of today are our future tomorrow, if we don't take care of America's youth - how will we see a better brighter future for our country in the days to come. It is imperative that we fix the American educational system and my team and I will see to it that we do. First we are going to strengthen school security, with a more secure school environment

students will feel school is a safer environment and will pay better attention in class. In order to do this we are going to hire extra security guards and install metal detectors and cameras for each school. Secondly we are going to fix schools budgets, in different areas there are some schools that lack the funding to help give kids the education they need. My team and I are going to fix this by moving funding from schools that don't necessarily need it and giving it to the schools that do. This change will help give students the chance to get the education they need and also provide them with extracurricular activities that are vital to a students development. With the help from my team and I, the U.S. educational system will be fixed and every student will have a fair chance to achieve the proper education.

The United states has numerous problems with the economy as well. From wage gaps between genders, to ridiculously high debt, the economy needs a lot of work. Men and women of the workplace should be treated equally but unfortunately it's a fact women statistically make less than men for similar if not the same jobs. My team and I are going to work diligently to close this gap and see to it that women have equal pay as men do. We are also going to undertake the endeavour of reducing the debt of our authoritative and extremely capable country. We will do so by budgeting and moving any leftover money towards the country's debt. I cannot promise that I will be able to get rid of the debt but we will significantly lower it so it becomes less of an issue and in doing so we can shift our focus onto other economic issues. With the help of my team we can work together to fix the United State's economy for the better.

We have also have seen an increase in activity from multiple different terrorist groups such as the Islamic State of Iraq and Syria A.K.A. ISIS. ISIS has become the deadliest terrorist organization of the new Millennium. They see a future in death and therefore we cannot eradicate them through any means but force. But the trouble does not stop there, as we have learned from our history, when we leave the area they regroup and reform we need to destroy their motive and ensure the area is controlled by a strong democratic leader who is bipartisan. Hello my fellow Americans, my name is Dylan Piccione and I am running to be president of the United States. Since I was 10 years old I have been hard at work to help provide for my family and did as much as I could to help them out. I was also leader of a raid and crucible team which won many tournaments and matches against some of our toughest opponents. As president I will be hard working and make smart decisions to help give America the leader they need and deserve. My goal is to help keep America as the strongest nation on the planet, with the help from my campaign team and the citizens of the United States.

The United States is in dire need of a better educational system, there are many kids in the U.S. who are not getting the proper education they need to become successful adults. This upsets me because the kids of today are our future tomorrow, if we don't take care of America's youth - how will we see a better brighter future for our country in the days to come. It is imperative that we fix the American educational system and my team and I will see to it that we do. First we are going to strengthen school security, with a more secure school environment

students will feel school is a safer environment and will pay better attention in class. In order to do this we are going to hire extra security guards and install metal detectors and cameras for each school. Secondly we are going to fix schools budgets, in different areas there are some schools that lack the funding to help give kids the education they need. My team and I are going to fix this by moving funding from schools that don't necessarily need it and giving it to the schools that do. This change will help give students the chance to get the education they need and also provide them with extracurricular activities that are vital to a students development. With the help from my team and I, the U.S. educational system will be fixed and every student will have a fair chance to achieve the proper education.

The United states has numerous problems with the economy as well. From wage gaps between genders, to ridiculously high debt, the economy needs a lot of work. Men and women of the workplace should be treated equally but unfortunately it's a fact women statistically make less than men for similar if not the same jobs. My team and I are going to work diligently to close this gap and see to it that women have equal pay as men do. We are also going to undertake the endeavour of reducing the debt of our authoritative and extremely capable country. We will do so by budgeting and moving any leftover money towards the country's debt. I cannot promise that I will be able to get rid of the debt but we will significantly lower it so it becomes less of an issue and in doing so we can shift our focus onto other economic issues. With the help of my team we can work together to fix the United State's economy for the better.

We have also have seen an increase in activity from multiple different terrorist groups such as the Islamic State of Iraq and Syria A.K.A. ISIS. ISIS has become the deadliest terrorist organization of the new Millennium. They see a future in death and therefore we cannot eradicate them through any means but force. But the trouble does not stop there, as we have learned from our history, when we leave the area they regroup and reform we need to destroy their motive and ensure the area is controlled by a strong democratic leader who is bipartisan. In addition, we will observe this new leader and intervene if there are any human rights violations. You do not decrease the crime rate when you reduce police activity, why would you do the same in the middle east? The middle east is delicate and especially difficult to govern because there is no separation between religion and state. This means most forms of legislature are governed by their holy laws. Radical forms of their religion are what sprouts terrorism. It will be very hard to do this but once achieved many middle eastern countries can achieve first world status among the rest of civilized nations. Overall with the help from my team we can see to it that the U.S. is a safer place for all Americans with fewer threats from outside nations.

My goal for the United States is to use my my leadership and work experience to give this country a push in the right direction, so that all citizens may have an easier happier life. Thank you very much for your time and may you enjoy the rest of your day.
